-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on May 4, 2009, is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Broadway (US 2004/0224584). Broadway discloses a facing sheet for cement boards comprising a scrim and polymer film. The scrim has a plurality of intersecting yarns defining an open mesh pattern with an inner face defining a grid profile for mechanical interaction with the cementitious composition of the cement board. The polymer film is joined to an outer face of the scrim and defines a repeating pattern of openings. The polymer film facilitates the mechanical interaction between the grid profile of the scrim and the cementitious composition and allows the passage of moisture from the cementitious composition during hardening of the cement board. The scrim may include glass fibers yarns and the polymer film may be formed by a gravure rolling process (abstract). The

polymeric material can comprise a thermoplastic material [0007]. The polymeric material is present in an amount of 10-16 gsm [0026].
